COMP 40 Lab: Points, lines, and planes

COMP 40

September 16, 2011

In this lab, the questions are online. You'll work in **groups of four** for 30 or 40 minutes, submit your answers, then discuss with half the class.

Please do not work with the same partner you had for the intro assignment. If you and your partner are in alphabetical order, and you are first, you work in room 116. If you and your partner are in alphabetical order, and you are second, you work in room 118.

Choose a record-keeper, run

```
git clone /comp/40/git/array-lab
```

on the record-keeper's account. and start working! Edit your answers directly into your copy of the file.

Before the full-class discussion, please submit your copy of the file using `submit40-lab-arrays`.
