Instructions

Write the output produced by each of the following Python programs:

1. 
   ```
   x = 5
   y = 3
   print x * y
   ```

2. 
   ```
   mouse = “Mickey”
   namelen = len(mouse)
   print namelen
   ```

3. 
   ```
   a = 5
   a = a ** 2
   print a
   ```

4. 
   ```
   x = ( (7+3) * 2)
   y = 8 % 5
   z = x / 4
   print y * z
   ```

5. Bonus question: how would the answer be different if question 3 above contained the following Python code instead:
   ```
   a = 5
   a = a ** 2
   a
   ```
